

JOHN SMITH

Electrical Engineer | john.smith@samplemail.com | +92 300 1234567 | Sample City

OBJECTIVE

Detail-oriented Electrical Engineer with 3 years of experience in power systems and control design. Seeking a challenging role where strong analytical skills and hands-on project experience contribute to reliable, efficient engineering solutions.

EXPERIENCE

Junior Electrical Engineer

Jan 2023 – Present

Sample Power Ltd., Sample City

- Designed and reviewed LV distribution panels for commercial buildings, reducing rework by 25%.
- Prepared single-line diagrams and load calculations using standard engineering tools.
- Coordinated with site teams during installation and commissioning of electrical systems.

Engineering Intern

Jun 2022 – Dec 2022

National Grid Services, Sample City

- Assisted senior engineers with substation maintenance schedules and testing procedures.
- Documented test results and prepared weekly progress reports for the project manager.

EDUCATION

BSc Electrical Engineering

2022

Sample University of Engineering, Sample City

SKILLS

Power system analysis • AutoCAD Electrical • MATLAB / Simulink • PLC programming • Technical report writing • MS Office
